Notes: 'Unspecified Supervision' includes individuals in counties which do not categorize supervision conditions into discrete levels. For counties which use discrete supervision levels, supervision levels were collapsed into 'Basic', 'Moderate', and 'Enhanced' supervision, though what each of these supervision levels mean varies widely across counties.

# AB 74: Tables

16. (d) The number and percentage of assessed individuals by supervision level who fail to appear in court as required, are arrested for a new offense during the pretrial period, or have pretrial release revoked.

Notes: 'Unspecified Supervision' includes individuals in counties which do not categorize supervision conditions into discrete levels. For counties which use discrete supervision levels, supervision levels were collapsed into 'Basic', 'Moderate', and 'Enhanced' supervision, though what each of these supervision levels mean varies widely                                                       across                                                       counties.

Data quality is low for failures to appear, new offenses during the pretrial period, and revocations of pretrial release. For future reports, FTA and new offense data will come from different data sources which are not currently available; probation departments keep limited records of FTA and new offenses. The data in this table includes individuals whose pretrial period is not yet complete, and may accrue adverse outcomes before completion of the pretrial period. The short time frame for this first reporting period means that that many programs have not been operational long enough to accurately measure outcomes.
